

ATTENTION EXHIBITORS

If you are planning to bring, use or generate any liquid chemical products or waste materials in your exhibit, you, as the exhibitor, are responsible for properly labeling and storing this material during the event, and arranging for proper waste removal and disposal after the event.

All liquids or solids brought to or used at PRINT 19 must be properly labeled and stored.

Enviro-Guard is the official hazardous waste removal contractor for PRINT 19 and will have representatives available at the event. Call Tom Cobos of Enviro-Guard at: (800) 943-6847 or (714) 526-2510 with any questions.

After the event, exhibitors must label this material and arrange for it to be removed and disposed of properly. To contract with the official waste removal company to remove these materials for you, see the *Enviro-Guard Order Form* on the following page.

Remember: All liquid and solid materials must be removed from the convention center by your company. Freight will be held during move-out if prior arrangements have not been made for removal of hazardous waste. Waste materials left on the exhibit floor at the close of the event will be billed back to your company, including the cost of testing and disposal. Abandoning these waste materials on the exhibit floor will affect your participation in future APTEch events. Additionally, a fine may be imposed on your company by the Environmental Protection Agency (EPA).
