EMERGING PRINT TECHNOLOGIES & APPLICATIONS

TABLE OF CONTENTS

TABLE OF CONTENTS.....	V
EXHIBITS.....	XI
I. EXECUTIVE SUMMARY.....	1
A. RESEARCH OBJECTIVES & METHODOLOGY	1
B. INTRODUCTION.....	2
C. MARKET SEGMENTS.....	4
Security Printing	4
2D Barcode Printing.....	7
Printed Electronics.....	9
3D Printing.....	12
Biomedical Printing.....	14
Nanotechnology	15
D. IMPLICATIONS AND RECOMMENDATIONS	20
II. INTRODUCTION AND METHODOLOGY.....	23
A. OVERVIEW OF REPORT.....	23
Printed Electronics and Displays.....	23
3D Printing.....	23
Biomedical Printing.....	24
2D Barcodes.....	24
Security Printing	24
Nanotechnology	25
Ink Jet – The Unsung Hero.....	25
B. RESEARCH OBJECTIVES & METHODOLOGY	27
III. SECURITY PRINTING	29
A. OVERVIEW.....	29
Market Forces.....	29
Applications	30
B. EMERGING REQUIREMENTS.....	32
Counterfeiting: Banknotes and Negotiable Securities.....	33
Identity Theft and Legal Forms	34
Intellectual Property, Tickets, Tags, and Labels	34
C. SECURITY PARADIGM	35

D. TRADITIONAL SECURITY PRINTING	36
Fine-line patterns.....	36
Microprinting.....	37
Colors and Inks.....	38
Watermarks.....	39
E. EMERGING TECHNOLOGIES.....	40
Biometrics.....	40
F. UNIQUE INKS	42
Taggants	42
Metameric inks	43
Thermochromic Inks.....	43
Optically Variable Devices (OVD).....	43
Holograms	44
Nanotechnology	44
Special Substrates.....	46
Digital Watermarks.....	46
G. CONCLUSIONS	46
Recommendations.....	47
IV. 2D MATRIX BARCODING.....	49
A. 2D BARCODE MARKET OVERVIEW	49
Additional Barcodes.....	50
B. QR CODES.....	52
Market Penetration	53
Printing a QR Code.....	56
Applications	57
C. DATA MATRIX CODES	64
D. BEYOND THE QR CODE: BLIPPAR & TOUCHCODE	66
Blippar	66
Touchcode	68
E. OPPORTUNITIES FOR VENDORS	69
F. RECOMMENDATIONS AND PROJECTIONS.....	70
V. PRINTED ELECTRONICS AND DISPLAY.....	73
A. INTRODUCTION	73
Definition.....	73
Applications.....	73

Product/Market Overview	74
Technology Overview	78
B. PRINTED ELECTRONICS & GRAPHICS PRINTING	81
C. PROCESSES.....	84
Printed Electronics Rquirements	84
Printing Parameters.....	85
Key Analog and Digital Technologies	86
Status of PE Technologies	89
Throughput and Feature Size by Process.....	90
Materials.....	90
Materials for Printed Electronics	92
Technology Comparison for Printed Conductors.....	93
Ink Attributes	94
Substrates.....	95
D. HISTORY OF PRINTED ELECTRONICS	99
Investments Gone South	101
Case Study: Plastic Logic	103
Current State	105
Printed Photovoltaics Roadmap	107
Printed Photovoltaics Companies.....	108
Key Materials for Printed Photovoltaics	109
E. MARKET FORECAST	110
F. PRINTED DISPLAYS	111
Printed Liquid-Crystal Displays	111
LED and Printed OLED.....	112
Printed Backplanes and OLEDs	113
OLED Displays	114
OLED/EL Lighting.....	115
G. PRINTED MEMORY.....	117
Overview.....	117
Roadmap.....	117
Materials for Printed Memory	118
H. PRINTED SENSORS	119
Overview.....	119
Companies	120
I. FLEXIBLE BATTERIES	121
Overview.....	121

Companies	121
Materials for Printed Batteries	122
J. SMART TEXTILES.....	122
Overview.....	122
K. PRINTED RFID	124
Overview.....	124
L. PRINTED ELECTRONICS APPLICATIONS.....	125
RFID as a Microcosm of Printed Electronics	126
RFID from 2004 to 2012 and Beyond.....	127
RFID and Printing Technology.....	127
RFID Market Today	128
Niche Applications	129
Poor ROI for Broad Applications	130
Privacy and Security Concerns	130
Billion Dollar Printed Electronics Success Stories (so far . . .)	131
M. CONCLUSIONS.....	134
Recommendations.....	135
Specific Printed Electronics Opportunities for Print Industry	
Participants.....	135
VI. 3D PRINTING	137
A. INTRODUCTION	137
Definition.....	137
Description	137
Market Sectors of 3D Printing.....	139
History	140
B. STATE OF THE TECHNOLOGY AND MARKET.....	142
C. 3D PRINTING AND COMMERCIAL PRINTING	146
Relationship to Graphics Printing	147
Drivers of 3D Printing Market.....	151
Categories of 3D Printed Goods.....	173
Next Steps.....	178
Market Forecast.....	179
VII. BIOMEDICAL PRINTING	185
A. INTRODUCTION.....	185
Definition	185
Relationship to Graphics Printing	186

B. APPLICATIONS FOR BIOMEDICAL PRINTING	186
Biofabrication	186
Bioprinting	187
3D Bioprinting	193
Biosensors and Biochips	195
Biorecognition and Biosensors	197
C. PRINTED ELECTRONICS AND BIOSENSORS	198
Next Steps for Printed Biosensors	199
Microarray Basics.....	202
Making Microarrays.....	203
Combinatorial chemistry	204
Combinatorial chemistry concepts	205
Conclusions and Recommendations	207
VIII. NANOTECHNOLOGY	209
A. INTRODUCTION	209
Properties	210
Commercial Applications	211
Nanotechnology in Printing Applications	213
B. GRAPHENE	215
Description	215
Commercial Developments	216
Research and Development.....	219
C. CARBON NANOTUBES.....	220
Description	220
Commercial Applications	225
Printed Electronics.....	226
Research and Development.....	230
D. QUANTUM DOTS.....	233
Applications	234
Printing Technologies	236
Research and Development.....	239
E. RECOMMENDATIONS AND IMPLICATIONS	240
XI. CONCLUSIONS, IMPLICATIONS AND RECOMMENDATIONS	243
A. SECURITY PRINTING	243
Conclusions and Implications	243
Recommendations.....	244

B. 2D MATRIX BARCODING	245
Conclusions and Implications	245
Recommendations.....	245
C. PRINTED ELECTRONICS	247
Conclusions and Implications	247
Recommendations.....	248
Specific Printed Electronics Opportunities for Print Industry	
Participants	249
D. 3D PRINTING.....	249
Conclusions and Implications	249
Recommendations.....	250
E. BIO-MEDICAL PRINTING.....	251
Conclusions and Implications	251
F. SUMMARY.....	252
X. APPENDIX.....	255
A. ROADMAPS FOR ORGANIC AND PRINTED ELECTRONICS.....	255
XI. GLOSSARY	261
A. SECURITY PRINTING	261
B. 2D BARCODES	270
C. PRINTED ELECTRONICS	273
D. 3D PRINTNG	283
E. BIOMEDICAL PRINTING	307
F. NANOTECHNOLOGY.....	320

EXHIBITS

Exhibit I-1 Projected Security Printing Market Values by Application for 2015.....	5
Exhibit I-2: Value of Security Printing Market Sectors 2010 vs. 2015	5
Exhibit I-3 Sample QR Code	7
Exhibit I-4: The Heart of Printed Electronics—A Printed Transistor	9
Exhibit I-5: A Glimpse of the Printed Electronics Market—(Present and Future).....	11
Exhibit I-6: Total Value of 3D Printed Goods.....	13
Exhibit I-7: Global Forecast for 3D Printing Revenue (millions)	14
Exhibit I-8: Structure of Graphene	17
Exhibit I-9: Carbon Nanotubes	18
Exhibit I-10: Carbon Nanotubes Luminescence	19
Exhibit III-1: Security Printing Market Sectors.....	31
Exhibit III-2: Fine Line Guilloches.....	36
Exhibit III-3: Microprinting on Currency	37
Exhibit III-4: Currency and Banknotes.....	38
Exhibit III-5: U.S. Currency with Watermark	39
Exhibit III-6: DNA Analysis for Verification of Product Packaging	41
Exhibit IV-1: Sample, Microsoft Tag	51
Exhibit IV-2: QR Code with Finder Pattern	52
Exhibit IV-3: Penetration of New Media Tech Across 19 Advanced Markets	54
Exhibit IV-4: U.S. Smartphone Ownership and QR Code Scanning Trends	55

Exhibit IV-5: QR Code Usage by Country, January 2013.....	56
Exhibit IV-6: Total Audience that Scanned QR Code With a Mobile Phone	58
Exhibit IV-7: Young Adults Who Have Scanned a QR Code	59
Exhibit IV-8: QR Code Video Stamp	61
Exhibit IV-9: Mercedes-Benz Use of QR Codes for Rescue Instruction	62
Exhibit IV-10: Smart PJs	63
Exhibit IV-11: QR Code Wall at Indira Gandhi International Airport.....	64
Exhibit IV-12: Data Matrix Codes.....	65
Exhibit IV-13: Data Matrix Codes in Pharmaceutical	66
Exhibit IV-14: Tide and Pepsi Blippar Campaigns	67
Exhibit IV-15: Touchcode in Action	68
Exhibit V-1 Printed Electronic Applications	74
Exhibit V-2: Roadmap for Organic and Printed Electronics Applications.....	75
Exhibit V-3: Key Segments of Printed Electronics	76
Exhibit V-4: Printed and Potentially Printed Electronics	77
Exhibit V-5: Market for Printed Electronics.....	78
Exhibit V-6: A Printed Transistor.....	79
Exhibit V-7: Technical Complexity in Printing Thin Film Transistors.....	82
Exhibit V-8: Printed Graphics vs. Printed Electronics	83
Exhibit V-9: Organic Electronics Vs. Classical Electronics.....	84
Exhibit V-10: Printing Parameters.....	86
Exhibit V-11: Print Processes and Print Electronics.....	88
Exhibit V-12: Print Processes and Print Electronics.....	89

Exhibit V-13: Throughput vs. Feature Size	90
Exhibit V-14: Thin Film Transistor Properties.....	91
Exhibit V-15: Materials for Printed Electronics	93
Exhibit V-16: Technology Comparison for Printed Conductors	94
Exhibit V-17: Functional Inks and their Attributes	95
Exhibit V-18: Important Substrate Requirements.....	96
Exhibit V-19: Substrate Characteristics.....	97
Exhibit V-20: Suitability of Substrates	98
Exhibit V-21: Substrates for Roll-to-Roll Processing	99
Exhibit V-22: Time to Market: Projected vs. Actual.....	100
Exhibit V-23: Investment and Printed Electronic Company Fates.....	102
Exhibit V-24: Investment Vs. Value Potential	103
Exhibit V-25: Venture Capital Investment in Printed Electronics.....	105
Exhibit V-26: Printed Electronics Generating Interest	106
Exhibit V-27: OLED Passive Matrix and ODED Active Matrix	113
Exhibit V-28: The Market for Printed & Potentially Printed Electronics, 2012	126
Exhibit V-29: Printed RFID Timeline	128
Exhibit V-30: RFID 2012 Revenue by Product Segment.....	131
Exhibit V-31: Leading Participants in Printed Electronics.....	133
Exhibit V-32: Company Performance in Printed Electronics.....	134
Exhibit VI-1: Additive vs. Subtractive Manufacturing.....	138
Exhibit VI-2: The 3D Printing Hierarchy	140
Exhibit VI-3: Google Hits for Global Search Term 3D Printing (Millions).....	143

Exhibit VI-4: 3D Printing Goes Mainstream	144
Exhibit VI-5: Gartner Hype Cycle – 2012	145
Exhibit VI-6: Gartner Hype Cycle – 2013	146
Exhibit VI-7: University of Virginia Unmanned Aerial Vehicle.....	153
Exhibit VI-8: Two Ways to Make a Duck	157
Exhibit VI-9: Technologies Developed from Additive Manufacturing.....	157
Exhibit VI-10: Vat Polymerization: Stereolithography	159
Exhibit VI-11: Material Jetting – Object Polyjet.....	161
Exhibit VI-12: Binder Jetting.....	162
Exhibit VI-13: Material Extrusion (Thermoplastic Extrusion Technology).....	165
Exhibit VI-14: Powder Bed Fusion.....	166
Exhibit VI-15: Sheet Lamination.....	168
Exhibit VI-16: Directed Energy Deposition: Laser Engineered Net Shaping (LENS)	170
Exhibit VI-17: Directed Energy Deposition: Electron Beam Free Form Fabrication (EBFFF). 170	
Exhibit VI-19: Tensile Strengths of 3D Printed Objects	173
Exhibit VI-20: How 3D Printing is Used in Manufacturing and Industry.....	174
Exhibit VI-21: How Do You Use 3D Printing?	175
Exhibit VI-22: Examples of 3D Printing	176
Exhibit VI-23: Most Wanted Feature in 3D Development.....	179
Exhibit VI-24: Additive Manufacturing Products and Services – 2011	180
Exhibit VI-25: 3D Printed Part Market Grows to \$8.4 Billion in 2025.....	181
Exhibit VII-1: Cell and Biofactor Printable Biopapers.....	187
Exhibit VII-2: Computer-Generated 3D Image of the Patient with Implant in Blue.....	194

Exhibit VII-3: Biosensors and Biochips	195
Exhibit VII-4: Schematic of a Biosensor	196
Exhibit VII-5: Application of Microarray in Gene Analysis	203
Exhibit VII-6: Making a Microarray.....	204
Exhibit VII-7: Combinatorial Chemistry.....	206
Exhibit VIII-1: What is Nanoscale?.....	209
Exhibit VIII-2: Nanoscale Approaches and Fabrication.....	211
Exhibit VIII-3: Nanographic Printing.....	214
Exhibit VIII-4: Structure of Graphene	216
Exhibit VIII-5: MeadWestVaco Natralock with Siren Technology	218
Exhibit VIII-6: Carbon Nanotubes.....	221
Exhibit VIII-7: Mechanical Properties of CNTs.....	222
Exhibit VIII-8: Conductivity Properties of CNTs	223
Exhibit VIII-9: Types of CNTs.....	224
Exhibit VIII-10: CNTs Price vs. Production Capacity	225
Exhibit VIII-11: Types of CNTs.....	228
Exhibit VIII-12: Carbon Nanotubes Market by Industry.....	229
Exhibit VIII-13: Carbon Nanotubes Applications	230
Exhibit VIII-14: Carbon Nanotubes Luminescence	234
Exhibit VIII-15: Nanoparticle Inks and QR Codes in Security Printing	239
Exhibit VIII-16: Challenges Ahead for CNT Development.....	241
Exhibit IX-1: Roadmap for Organic and Printed Electronics Applications	256
Exhibit IX-2: Roadmap for Flexible Displays	256

Exhibit IX-3: Roadmap for OLED Lighting.....	257
Exhibit IX-4: Roadmap for Printed Memory.....	257
Exhibit IX-5: Roadmap for Printed Sensors.....	258
Exhibit IX-6: Roadmap for Printed Batteries.....	258
Exhibit IX-7: Roadmap for Smart Textiles.....	259
Exhibit IX-8: Roadmap for Printed RFID.....	259
Exhibit IX-9: Roadmap for Printed Organic Photovoltaics.....	260
