

the *Journal of the American Medical Association* (JAMA) and the *New England Journal of Medicine* (NEJM) are the most widely read and cited medical journals in the United States. The *JAMA* is published weekly, while the *NEJM* is published weekly, except for two issues that are published bi-weekly.

The *JAMA* and the *NEJM* are both peer-reviewed journals, which means that each article submitted for publication must be reviewed by a panel of experts in the field. This process helps to ensure the quality and accuracy of the research published in these journals.

The *JAMA* and the *NEJM* are both highly respected journals, and their publications are often cited in legal cases involving medical malpractice. This is because the journals are considered to be the most authoritative sources of information on medical research and practice.

The *JAMA* and the *NEJM* are both published by the American Medical Association (AMA). The AMA is a professional organization that represents the interests of physicians in the United States. It is one of the largest and most influential organizations in the medical profession.
